- Backend: Golang, Cloudflare Workers, Node.js, Rust.
- Databases: Microsoft SQL Server, MySQL, MongoDB, PostgreSQL, SQLite, Redis
- Frontend: React, Next.js, Astro.
- Cloud experience: Google Cloud Platform, Azure and most lately Cloudflare.

Languages

- Spanish: Native
- English: Professional proficiency

Experience

Rumis App (2024 - present)

Founder and Software Engineer

Panamá, Panamá

The only way to find rooms and create groups of roomies easily

Omniscape XR (Nov 2021 - present)

FullStack Software Developer (Main backend)

North Carolina, United States (remote)

Worked with the team responsible for OmniscapeXR web platforms (VR, AR).

Worked with 3D on the web technologies such as [deck.gl](#) and h3.js.

Built the 3D Marketplace for items compatible with the OmniscapeXR Platforms and the Virtual Real Estate Platforms.

Built the Core Services API in golang to handle authenticated requests and CRUD + Ad Hoc operations for all 3 Apps (desktop, mobile and web).

HypernovaLabs (Jun 2021 - Nov 2021)

FullStack Software Developer (Main backend)

Panamá, Panamá

Worked mainly as a backend for multiple teams, providing software service to brands and businesses like Adidas, Cochez, Felipe Motta, etc.

Developed internal tools.

Education

- **Bachelor of Software Engineering** (until third year), Universidad Tecnológica de Panamá
 - First place at the [2021 Hackathon](#)
